

Vuente and Odoo Servers and Developer Access

Today we want you to understand our server configuration and management of such. Taking in the global capacity of Odoo developers and the ability for us to protect both ours and our clients productivity means we need to have an organizational structure that supports all parties involved. Adopting this structure we can delegate with an element of uncertainty to new Odoo developers into our Vuente Small Business Community and keep development productivity cycling for greater than just our local timezones work hours Vuente Production server gets in effect minimal development work and all new modules to be implemented to a Vuente business management system would go via our Odoo App Store account, be they free or paid modules.
